# Integrated Valve Tissue Expanders

A range of expanders – tools typically used by physicians to prepare for breast reconstructive surgery. They’re available in 3 configurations (heights) with 16 variations to complement our Matrix range of anatomical implants.

- 3 different configurations with 16 variations
- Variable heights
- High projection
- Large integrated magnetic port with self sealing technology and needle stop
- Reinforced base layer to insure unidirectional expansion
- Unique, re-usable and ergonomically shaped external location device enabling efficient valve detection
- Complements the Matrix by Eurosilicone range of anatomical implants
