

DATABEAST AG / LMCO.COM – TigerLeopard Project Benefits v1.00
Bonze Annette Rose Blayk, President, DATABEAST INC (TIN 16-1470153)

- Investments in DATABEAST AG undertaken to attract funding for Swiss secure communications R&D through \$3G USD of offsets available on the Swiss purchase of F-35A flight systems for \$6G from Lockheed-Martin will
 - Yield benefits to Swiss authorities through direct expenditures and employment taxes
 - Promote optonic communications technologies and secure networking in general
 - Promote Swiss industry e.g. fabrication of secure terminals to designs developed and manufactured by our Swiss corporate associates so they remain trustworthy in installations designed to provide optimal security - e.g., through properly shielded EMR which may otherwise allow "leakage" of information to hackers see (<https://www.schneier.com/blog/archives/2024/01/side-channels-are-common.html>)
- The Intellectual Property of DATABEAST INC in dataComet source code is transferred to DATABEAST AG as a full-featured Telnet application, useful for further development if desired on Mac or alternate platforms - the C-language source code in dataComet uses Apple's Carbon API (Application Programming Interface) primitives under Mac OS X rather than the high-level "object-oriented magic" provided with Apple's newly-deprecated Cocoa frameworks, so porting to other platforms such as X-Windows over Linux is greatly simplified.
- A highly amusing *indirect* and otherwise-impossible DEI Hire of an MtF transsexual for Lockheed-Martin:
Annette is of Anglo-Norman (1620 Virginian + Huguenot + Cherokee + African) origin from the state of Arkansas USA and has remained lamentably right-wing since young adulthood as a "Goldwater Man" (benightedly Anarcho-Capitalist AND "Was once a True Believer in the Nuclear Triad!")

THE PROBLEM: I've been under intense surveillance by The Authorities for well over ten years under what appears to be a FISA surveillance warrant and *this isn't working out for me!*

THE SOLUTION: "The Ironoclasm" - Since "The only way out of The Aquarium is through the incinerator"† I am signing up for a lifetime of service in a different fishbowl!
