STATE OF NEW YORK
COUNTY COURT : COUNTY OF TOMPKINS

THE PEOPLE OF THE STATE OF NEW YORK,

                                              ORDER OF CONDITIONS
                                              CPL 330.20(7)

                         against   Indictment No. 97-019

KEVIN E. SAUNDERS,

                              Defendant.

The above named defendant having been found not responsible by reason of mental disease or defect; and the court having ordered a psychiatric examination of defendant pursuant to CPL 330.20; and the court having reviewed the reports of the psychiatric examiners; and said psychiatric reports unanimously indicate that defendant is not mentally ill and does not suffer from a dangerous mental disorder, but recommend continued mental health treatment for defendant; and the court and the parties being in agreement thereon, and this court having issued a release order;
NOW THEREFORE, upon STIPULATION of the parties, it is

ORDERED that the above-named defendant comply with each term and condition of the treatment plan prescribed for the said defendant by the State Office of Mental Health, and it is further

ORDERED that the above-named defendant attend an outpatient mental health treatment program as designated by the Commissioner of Mental Health for the State of New York or by his designee. Said

treatment may include but is not limited to the following:

a) periodic psychiatric assessments or evaluations including medication reviews in time and frequencies determined by the Commissioner or his designee;

b) Taking medications as directed by the treating physician and submitting to appropriate laboratory test for levels of neuroleptic medications as directed;

c) Participating in a variety of group and individual therapy program activities as directed in times and frequencies determined by the Commissioner or his designee;

d) residing in housing meeting with the approval of the Commissioner or his designee;

e) Refraining from changing his place of residence without the prior approval of the Commissioner or his designee

f) Keeping the Commissioner and the District Attorney apprised of his current address;

g) Refraining from indulging in the use of any unauthorized drugs and from indulging in the consumption

of alcoholic beverages

h) Submitting specimens for laboratory/sobriety screenings administered for the purpose of detecting the presence of unauthorized or illicit drugs or alcohol as directed by a physician;

i) If the patient is directed to attend a clinic or program that is not operated by the Commissioner of Mental Health, he shall authorize his treating clinician to submit semiannual reports to the Commissioner of to his designee describing the patient's current condition, the extent to which he is complying with the treatment plan and with the order of Conditions, as well as the patient's adaptation to community based living, and it is further

ORDERED that the above-named defendant comply with this order for a period of FIVE years from the date of the issuance of this order, unless the court shall sooner terminate this order, or unless the court, for good cause shown, shall extend the order for an additional FIVE years.

This is where the rubber hits the road in the processes of "psychiatric diagnosis," when a New York State Assistant Attorney General grills you about your "narcissistic tendencies" and embeds in the formal legal and clinical record the SOLE MENTION of a computer program involving Network Security applications, and putting both its value and my underline *values in question…* **COMET/dataComet-Secure.**

Just checked this request for a license upgrade from the ones NASA had previously made for dataComet and dataComet-Secure, and the implications of the perjuries committed in my case in 2003 are *just that bad*. Especially if you know who "SAIC" are?

That's *deep* in the heart of the military-industrial-intelligence complex: it's that bad, as in *this is a potential* <u>nightmare</u>.

Here's my contemporary reproduction from memory of the *deeply weird* session that I had with Dr. Tara Belsare down at the Elmira Psychiatric Center back in June of 2002... just after Alice Richardson induced my *first* psychosis caused by PCP:

         for license for COMET code which I developed for Cornell — 7.5% of gross sales.

† Persisting sales in 2003-2004 were driven by my early 2003 OS X-compatible dataComet 10.0 release.
  Bill Garrison of Standard Orbit handled sales and support on a contract basis.
  I was acquitted as NGRI July 28 1997 on charges of arson from 2/6/97;
  In November 1996 I had commenced working under contract for Mann Library for $27.50/hr, which was cancelled after 2/6.
  I was institutionalized April 2003 under 330.20 following a finding of "Dangerousness";
  I was released from hospitalization back into the community in November 2007.
  I was given a complete Discharge from supervision by the OMH under 330.20 in July 2012, with no conditions.

dataComet has been sustained through successive revolutions in Macintosh technology, requiring the overhaul or replacement of almost all of the original code in COMET.

MacOS 8   1997

PowerPC transition   1998

    Corollary — Aztec C/MPW port to CodeWarrior development environment

MacOS X / OS9   2003

    Corollary — CodeWarrior port to Macintosh XCode development environment

    Corollary — Most GUI interfaces modified, all network code to UNIX environment

Intel transition   2009

    Corollary — More gutting and debugging… all integers now LSB not MSB

iOS Merge into OS X — Near Future
    Corollary — All Classic APIs, upon which dataComet still relies, are destined to disappear suddenly… "someday".

The "Classic" APIs have now been deprecated in toto by Apple; thus, without huge changes to the dataComet codebase…
    … COMET / dataComet is doomed.

Therefore, it's a good idea to place all the code into the public domain in some fashion, because

1) Some of the code I have developed may have enduring value; it's possible that others may wish to adapt it;
2) I am no longer capable of doing coding beyond light maintenance work;
3) … and besides, there's no way to make real money from it!

          Sincerely Yours —   Bonze Anne Rose Blayk

PS: I did not name COMET… I suggested COMTE, after Auguste Comte, the French philosopher and inventor of the philosophy of Positivism; alas, no one recognized the name! Steve Worona countered with the suggestion that this product be named COMET — the "COrnell Macintosh Emulator of Terminals", and that went over OK.

PPS: The development of COMET was not officially sanctioned by higher management; when I asked Dick Cogger back in 1990 whether anyone would object if I devoted time to working on combining C19, TN, and TN3270 into one package, he said "Sure… I don't think anybody would mind." (I was supposed to be working on SLIP/SLAP Remote Access software - cf. EZ-REMOTE? - but the $25,000 of hardware I required to work on it was not forthcoming. ;-)

Ergo…

ow delicately you

Us. Hence by gradual steps have come our latest attempts at studies of complex characters, in their struggle to solve the problems of life; or what are objected to as "problem plays." Well, why object? Every play, from _Charley's Aunt_ to _Hamlet_, is a problem play. It is merely a matter of degree. Every play deals with the struggle of men and women to solve some problem of life, great or small: to outwit evil fortune. It may be merely to persuade a couple of pretty girls to stay to luncheon in your college rooms, when their chaperon has not turned up. It may be something more important. The more interest the public and the dramatist take in human nature--that is to say, the better developed they are as regards dramatic sympathy--the more. rich, vivid, and subtle will be the play of character and passion, in the drama demanded and produced. In a word, the less wooden-pated and wooden-hearted they become, the less mechanical and commonplace will their drama be. We are slowly emerging from the puppet-show conception of drama. Our dramatists are beginning to do more than refurbish the old puppets, and move them about the stage according to the rules of the "well-made" play. They are not content, like their predecessors, to leave their characters quite at the mercy of the actor who, in "creating" them, gave them whatever small resemblance to humanity they may have possessed. And as the play gains in vitality, the playwright begins to feel the absolute necessity for writing decent dialogue--not mere stage dialect that may be scamped and ranted _ad libitum_ by the "star" to suit his own taste, or want of it, but real dialogue. which, while ideally reflecting the colloquial language of the day, taxes the intelligence and feeling of the actor to deliver properly. This means real progress: for the dialogue
