

Dr Epmke -

2/6/17

Please note that even the standard GC/MS test is inadequately sensitive to detect all cases of PCP intoxication.

I have clearly established that in 2002 & 2003 Alice H. Richardson LPN spiked my marijuana - use of which has been generally beneficial to my wellbeing and high productivity as a computer programmer - with PCP, in order to take over my house and use it as a "storage dump" following my admission to the Elmore Psychiatric Center in 2003.

She clearly suffered from Hoarding Disorder per the DSM-5,

thanks,

Alice Rose Blayk

Sara Blayk
