### Subjective

#### - Subjective

**Service Type:** 99231 Hosp care 15 min low complexity

#### **Subjective:**

The patient is less irritable and less dismissive today. She talks at lengths about delusional experiences in which a hacking organization tampered with her car, her house and other elements of her life. I gather from this discourse that Anne Rose has been struggling financially for sometime. She has no cash reserve remaining but insists that she's awaiting a wired transfer of \$10,000 from her brother in California. When asked if we can contact him, she declines, stating "No, my brother has Aspergers; he's very secretive and not easy to get ahold of." She reports that her car is now disabled and parked in the parking lot of the mall. She also admits to me that the electricity and gas are turned off on her property secondary to non-payment but states that she has a gas generator that she will turn on as long as she can \$100 for gas from her neighbor. She declines permission to contact this person either. When asked about her diagnosis and need for continued medication, she reports that she does not, and never has had psychosis. "My diagnosis is Hystrionic Personality DO, HPD, and OCD."
