Subjective

- Subjective

Service Type: 99232 Hosp care 25 min moderate complexity

Subjective:

The patient is evaluated in the presence of Dr. Kevin Field, who knows the patient as his primary therapist in the community. The patient is irritable and makes a show of pointing out various "safety violations" related to the plumbing and electrical outlets in his bathroom. He insists that we take him to a different area of the hospital for the interview "because I was never properly admitted." He is quite litigious, pointing out that his paperwork has a gender designation of male, which renders his 9.39 invalid in his opinion. The patient either refuses or is incapable of giving us concrete responses about his housing situation, which I understand from SW notes to be tenuous. "I don't have to tell you about where I'm staying. My brother is wiring me \$10,000 and I can easily get a place to stay. Are you saying I'm incompetent?" Dr. Field indicates to me that this presentation is very far from the patient's baseline, which is chronically delusional, but polite and redirectable. The patient continues to refuse medications.
