

## Progress Note

Patient: BLAYK, BONZE ANNE ROSE  
DOB/Age: 05/01/1956 62  
Admission Date: 09/19/18

Account Number: A00088518428  
Medical Record#: M000597460

Provider: Mahfuzur Rahman MD

## Progress Note

### - Progress Note

**Date of Service:** 09/23/18

**Note:**

Went to see patient as per consult request. At first patient was fine and when she realized that I was from the BSU she became defensive and brought up her past experience with writer and went into tangent and finally asked the writer to get out if I didn't mind.

It is evident that she has redness and swelling on oral-facial region but not in severe distress. Alert and oriented to time, place and person. Irritable, uncooperative and threatening but no indication of perceptual disturbances. Denies SI or HI. Insight and judgement is impaired.

A/P : With limited assessment allowed by the patient it is unclear about risk for violence. However, I will advise caution the safety of others.

May continue to give Haldol 5mg po or IM for agitation along with Lorazepam 1-2 mg po or IM depending on patient cooperation.

Continue rest of psychotropic meds.

Psychiatry to try again ASAP to assess patient to assist Medical team with psychiatric care as appropriate.
