Consult **Consult:**

Psychiatry attempted to visit with this 62 y.o. single, white, male to female transgendered patient with a history of chronic psychotic and personality pathology, who is currently admitted to the ICU following an altercation with others, including law enforcement, at a local Denny's restaurant in which he was struck in the face, resulting in nasal fracture and elevated CPK. The patient was agitated and combative in the ER, requiring stat administration of IM lorazepam, ziprasidone and ketamine, as well as mechanical restraint for patient's and others' safety. On exam the patient remains in soft restraints and is obtunded, difficult to arouse and incoherent in speech. Psychiatry will attempt to see her again tomorrow.
