As promised, here follow searchable PDFs of the evidence I offered in court on July 14 2021 as attachments, along with an image of the cash receipt contradicting the false accusation made by Denny's Assistant Manager Amanda Rojas that I skipped on a check on the evening of September 18 2018 - the night *before* the morning I was assaulted by G.I. Herz and John Joly of the Ithaca Police Department - repeated by Denny's staff member Jessica L. Smith in a Voluntary Statement on Page 014 of the Prosecution's (sealed) evidence provided in their initial disclosure to me as attorney *pro se* on July 17 2019 accusing me of trespassing without noting 1) No one *ever* told me I was unwelcome at Denny's prior to G.I. Herz bouncing me! and 2) Staff at Denny's had served me breakfast *while* calling in Amanda Rojas to call for the police to eject me? Both true!

"2018-09-18 PAID 0745 PM \$14.73 CASH to Denny's by Bonze Anne Rose Blayk - Order 337715 - All-American Slam w Coffee - Server Janette D - IMPEACHING Amanda Rojas - CR-08365-18#1 - trimmed 4x6.jpg"

The Prosecution's case always sucked. It was based on perjury... all the way down.

Regarding the S. Satti 2006-04-14 document that wound up in the hands of the Prosecution... I cannot dignify it by referring to it as "garbage." I spend 20+ years developing and supporting communications software, and I get **that** as "care and treatment?" Satti really believes a mental hospital is *the* place for me to be at long last picking up rudimentary social skills among *severely* ill "peers" prone to intermittent outbursts of violence? Some wildly psychotic? Where do you think I picked up PTSD? **IN THE GULAG!**

I spent 8 1/2 years at Cornell as a Systems Programmer (1985-1994) and doubled my salary in real terms over that timespan. I spend 4 1/2 years in the Gulag† after being poisoned with PCP in 2003 – April Roberts MD (EPC) practically diagnosed that at the time - and what do I get for it?

"Psychiatric evidence" provided by a perjurer so incompetent that she doubles the number of interviews conducted over the course of the past 18 months from one month's filing to the next! **CAVEAT EMPTOR.**

the mind boggles. the toxicity... I apologize for going overboard, but I am overwhelmed by the grotesquerie of it all.

thanks

- Rosie-Anne Quvus aka bonze blayk!

† In 2018 I finally came to realize that NYS AAG Carol Cocchiola unveiled a *fatal* insult to my trustworthiness as a software developer in her final argument for Recommitment in May 2003 – one ultimately based on some obscure arguments in personality theory and diagnosis? – that as a person with a Personality Disorder NOS "with Narcissistic features" I would perform some radical evil if a potential customer declined to order dataComet... the context is damning. I had a guaranteed order of some scale for an upgrade to dataComet-Secure pending with NASA HQ... and *some people* were freaking out over it? OMG. NASA trusted me, Lockheed-Martin trusted me, Raytheon trusted me, Cornell trusted me, UPenn and many other schools trusted me, the New York Times and other fine publications such as Der Spiegel trusted me as site licensees...

But no: Who needs 20 years of results as evidence of professionalism and devotion to systems security as a byword, when you have a Clinical Psychologist on hand to offer incoherent psychobabble? Regarding the *fantasy world* I inhabit as a ~~Narcissist~~ systems geek! That's why I led the Official Release of 230 pages of dataComet techno-trivia off with a cover page that references Philip K. Dick *and* Blue Öyster Cult as kind of a joke, because this "psychiatric history" belongs more properly among misfiled works of misbegotten "Science Fantasy" than medical science!
