call to Ruth Wang — Dr. Roberts at desk; I ask whether she intends to stay and listen to my legal consultation; she said "no I won't listen at all! I don't care at all" — I asked whether she would close her ears — eventually she left, I called MHS, Ruth was out, reached 9:30 AM. Discussed continual record/diagnosis followup with Megan.

more reasonable assessment of my treatment
needs.

requesting Roberts — Pournelli argued my ~~my~~ events
were "cyclical."

4/14 Monday "Povnelli" trigger word

Jason - Renie Gordon - Nicole - myself

Renie triggers outburst of hostility from Jason by criticizing "Dr" Pownelli. Jason defends Pown - interprets in antique cars & "big trains"

Jason deteriorates into irrational state, challenging Renie (and later on, me) "What's your first name?"

Demonstrates that Jason has been subjected to hypnotic suggestion implanted by Pown - tells us to "get out" of smoking room, assumes air of violent threat, an ordinarily nice guy displaying unwanted hostility

4/16 PEF "Keep Emma PC open" distributed to patients (Uuck)

4/22 Mom visits: Meghan "advises" her that discharge implies I must remain under supervision, & Mom "reads my duties" to "~~not~~ stop bucking the system."

→ "Team" informs staff Bill Garrison must MAIL business material, — dropping off cigarettes or personal effects would be "OK" !!!

4/17 Th Billie breaks plexiglass on "rights" frame,
shaming metal doors with her fist... gets dosed
but not calm!

- Earlier Joan Zucher dosed for complaining badly
Jo Blackwell has to have a cig at 6, Wanda
has told me "don't let anybody in [smoking room]
and don't give anybody a light", J. demands I
light him, calls me a bitch, I say no, Wanda [etc],
J. says "you have to go upstairs with me", I ask
for a cop to file a harassment complaint, none is
called. Billie still unrestored & not in jail.

4/18 Jason accosts me in the hallway, grabs me,
as I'm going past him, I grab back, he pushes
me around ^{abit}, tells me "Don't ever touch me, do you
want to fight? Do you want to fight?" and
then spits in my face! (Jason is somehow
related to J. Blackwell, duh!)

PEMS critique (Psycho-Educational Model) 11

- Point scoring equates good & bad behaviors & resolves into a single point score as if good & evil are commensurable.
- "Treatment Skills" are oversimplified, emphasizing rote responses/interactions over more nuanced interpersonal relations - card keeping is an

[Irony: Demonstrations of advanced skills may score fewer points than "target" skills]

intrusion into the flow of normal interaction, adding time multiples x5, extrinsic motivation, "card sharing"

PEMS critique

- Cards are cumbersome, subject to theft & forgery - Chits managed by staff would be more efficient: 3x5 form initials, points
- Group participation should get more points (No preformal)
- Negatives should count separately
- Points should ALWAYS be given for ^("Treatment skills") behavior - but aren't.
- Loss of level privileges to "Basic" is punitive
