VULCAN FACE

On August 19, 1914 the eruption cloud assumed the form of a human face and was photographed by a Forest Ranger and later copyrighted by R. E. Stinson in Red Bluff. Within a matter of seconds the face had vanished. Forest Ranger Photo.

We're trapped by a lady's stalled car behind us in the parking lot of the Post office at Fort Klamath, Oregon. No Mary just started the stalled car for her. OK, I gotta go. Love, Susan

A vibrant color photograph of a harbor scene in Garibaldi, Oregon. The foreground and middle ground are filled with numerous fishing boats of various sizes, mostly white with some red accents, docked at wooden piers. A prominent boat with a tall, white, lattice-like mast structure is docked on the right. The background features a steep, densely forested hillside with some buildings visible on the slope. The water is calm, reflecting the boats and the sky. In the bottom left corner, there is a red rectangular box with a yellow border containing the text 'GARIBALDI OREGON' in white, stylized, serif capital letters.

CRATER LAKE NATIONAL PARK

Crater Lake, Oregon

Crater Lake lies like a sapphire in the High Cascades, a million year-old mountain range of steep-sided volcanic cones built up in layer-cake fashion from andesite lavas and pyroclastic materials.
